Languages

Portuguese
Native

English
C1

Skills

Kotlin	PostegreSQL
Javascript, Nodejs, ExpressJs	Html, CSS
Git, GitHub, GitHub Desktop	Python
Java	C

Projects

2023/04 – 2023/06	**Riversi Project** ⎋ *Development of full functional frontend and backend APP* This is basically a game i made using Kotlin, Compose and mongoDB (for storage) but there are two versions: One with compose and the other one on the command line.
2023 – 2023	**Control Access System Project** ⎋ *Implemented with arduino UNO with an LCD* I used both hardware and software in this project which the goal was to create an Access System such as the ones you usually see at your appartment entrance. We used vhdl to imulate the door on the Arduino plate and kotlin to implement the door functionalities.

Organizations

Web Summit ⎋
2023/09 – 2023/09 | Lisboa, Portugal
I attended WebSummit to gain some experience and also to do networking. Basically what i did there was redirect people towards their desired corner in the Startup Portugal x Unicorn Factory x CML stand.
It was really fun because i met some amazing people and learned so much about this part of businesses

Professional Experience

Store Assistant
Electro Belmiro
2023 – 2023 | Lisboa, Portugal
I just got to work on my social skills such as attendance to the public, stock management and some minor jobs.
